Bike	Triumph Tiger 1200	Part No.	RTR-94
Year	2022-Current	Fit Kits	Z039.10724
Notes	Where not supplied use original fittings	dB Killer	SCEXDBK24 (TYPE W)

A) Loosen the clamp on the rear silencer.

B) Remove the nut/bolt from the silencer mounting bracket.

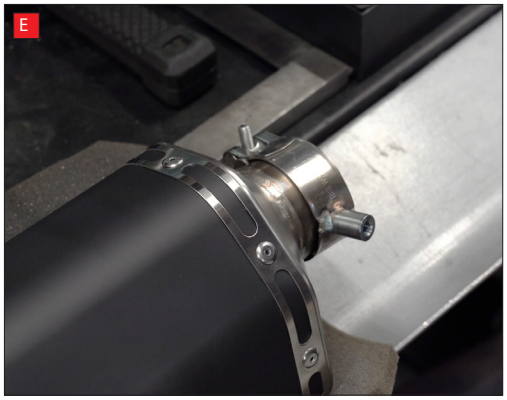

C) Carefully remove the silencer. If the gasket stays with the bike rather than coming away with the silencer, remove it as it's not needed when fitting the Scorpion Slip-on silencer.

D) Place the Scorpion silencer face down on a soft clean surface to avoid scratches, then attach the mounting bracket using the supplied hardware and spacers. There is a diagram on the first page showing the order they should be placed in. Leave the bolts slightly loose at this point to allow for adjustment, you will fully tighten them in a later step.

E) Slide the supplied clamp over the end of the silencer.

F) Slide the silencer onto the original exhaust pipe and line the bracket up with the original mounting point.

G) Attach the bracket/silencer to the bike using the original nut and bolt. Leave slightly loose to allow for adjustment, you will fully tighten in a later step.

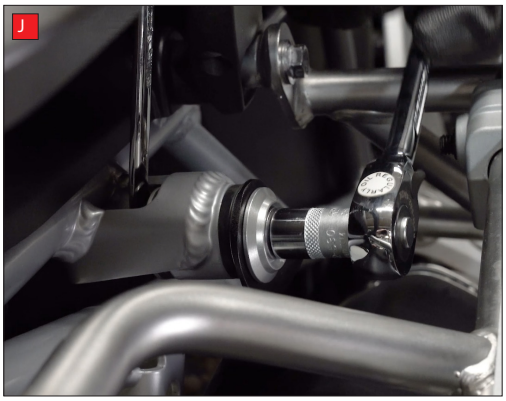

H) Position the clamp so that the welded boss is facing outwards then fully tighten the clamp.

Notes	Where not supplied use original fittings	dB Killer	SCEXDBK24 (TYPE W)

I) Fully tighten the 2 bolts on the back of the silencer mounting bracket.

J) Fully tighten the silencer mounting nut/bolt.

K) Attach the cover to the boss on the clamp using the supplied bolt and spring washer.

Take the bike for a short ride to ensure all functions are correct. When the bike & exhaust are cool enough check all nuts and bolts are still secure.
