CLASSIFICATION	Closed Circuit Product
HOMOLOGATED	NO
DATE	27/10/2026
ISSUE	03
AUTHORISED	G O'Shea

NOTE: ENSURE SCORPION SYSTEM IS CLEAR OF MOVING PARTS AND ALL ORIGINAL FUNCTIONS WORK CORRECTLY.

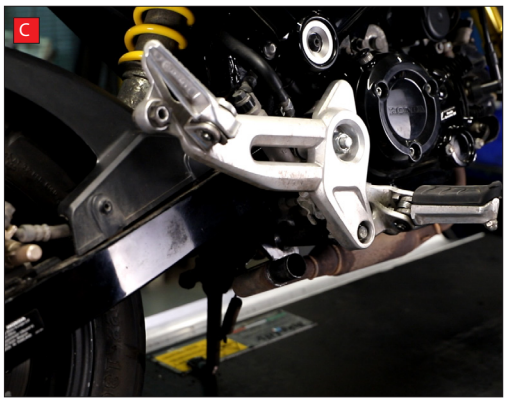

Bike	Honda MSX 125	**Part No.**	PHA-199
Year	2021-2023	**Fit Kit**	Z039.10715
Notes	Where not supplied use original fittings. Remove original gasket.	**dB Killer**	SCEXDBK49 (TYPE PD)

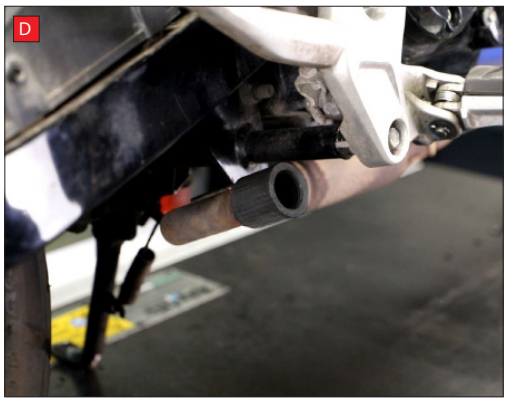

A) Start by loosening the clamp between the header pipe and the rear silencer.

B) Remove the nut on the back of the silencer mounting point, then support the weight of the silencer and remove the mounting bolt.

C) Carefully remove the rear silencer from the bike. If the gasket stays on the header pipe remove it now as it's not required.

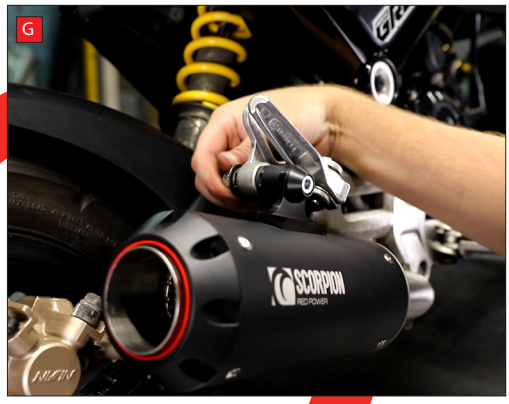

D) Place the supplied gasket onto the header pipe.

E) Slide the Scorpion connecting pipe along with the supplied clamp over the gasket on the header pipe.

F) Insert the connecting pipe into the Scorpion silencer and align the mounting bracket with the original mounting point.

G) Put the spacer between the mounting bracket on the silencer and the mounting point on the bike then attach with the supplied hardware. The diagram on the first page shows which hardware to use.

H) Fit the springs between the silencer and the connecting pipe.

Bike	Honda MSX 125	**Part No.**	PHA-199
Year	2021-2023	**Fit Kit**	Z039.10715
Notes	Where not supplied use original fittings. Remove original gasket.	**dB Killer**	SCEXDBK49 (TYPE PD)

I) Align the system so that it is sitting in the correct position and is clear of any moving parts, then tighten the clamp between the header pipe and the connecting pipe.

J) Fully tighten the silencer mounting bolt.

Take the bike for a short ride to ensure it functions as it should. Once the bike and exhaust are cool enough check all nuts and bolts are still secure.

SCORPION RED POWER
