STAY CONNECTED TO RED POWER.

SCORPION RED POWER

Bike	Yamaha MT-07 Euro 5+	Part No.	RYA-135-SYS
Year	2024-Current	Fit Kits	Z039.10760
Notes	Where not supplied use original fittings	dB Killer	SCEXDBK24 - (TYPE W)

A) Remove the heat shield from the catalyst.

B) Remove the plastic side panel.

C) Disconnect the 2 Lambda sensor plugs and feed the cables out.

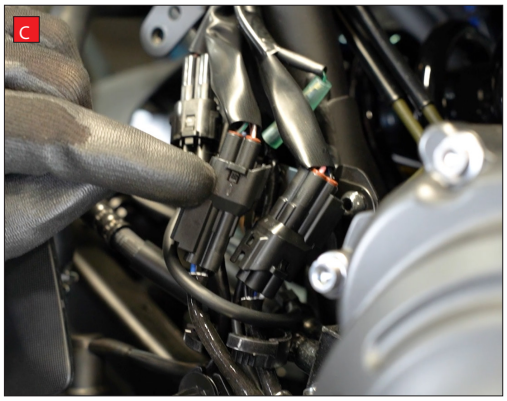

D) Remove the front Lambda sensor.

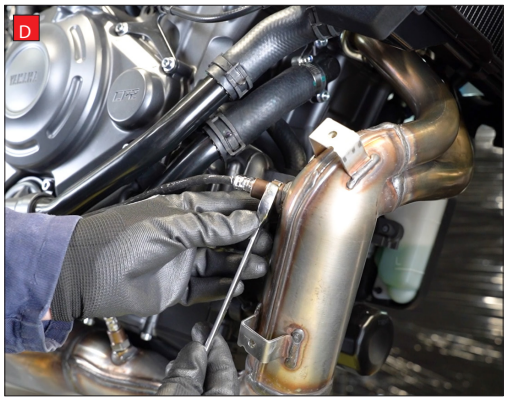

E) Remove the rear Lambda sensor.

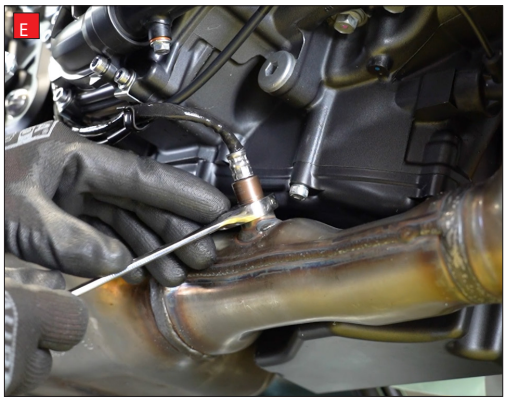

F) Remove the header nuts.

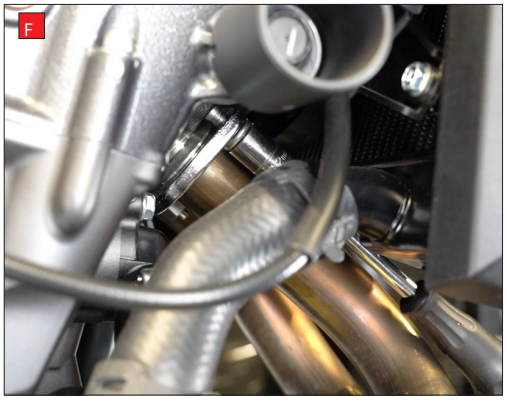

G) On the left side of the bike, remove the silencer mounting bolt.

H) On the right hand side of the bike, support the weight of the silencer, then remove the mounting bolt.

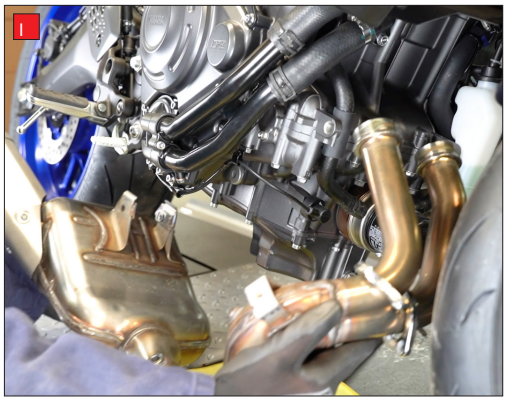

Bike	Yamaha MT-07 Euro 5+	Part No.	RYA-135-SYS
Year	2024-Current	Fit Kits	Z039.10760
Notes	Where not supplied use original fittings	dB Killer	SCEXDBK24 - (TYPE W)

I) Carefully remove the exhaust.

J) Loosely fit the Scorpion header pipes. You will fully tighten them in a later step.

K) Slide the collector onto the header pipes.

L) On the right hand side of the bike, fit the Scorpion mounting bracket to the original mounting point on the bike. Leave loose for now, you will fully tighten in a later step.

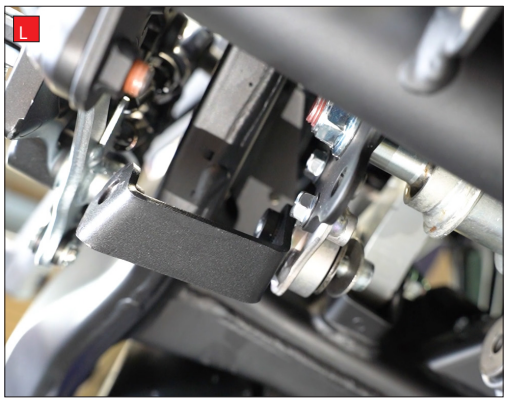

M) Slide the Scorpion silencer onto the collector and roughly align with the mounting bracket. If fitting the optional Flute, fit that into the end of the collector pipe now.

N) Secure in place with the supplied hardware. Leave slightly loose to allow for adjustment. You will fully tighten in a later step.

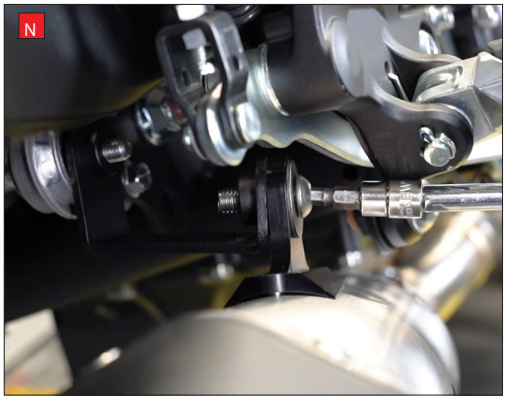

O) Install the springs between the headers and collector.

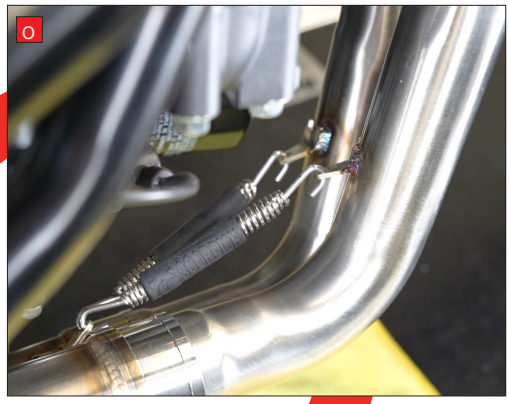

P) Install the springs between the silencer and collector.

Notes	Where not supplied use original fittings	dB Killer	SCEXDBK24 - (TYPE W)

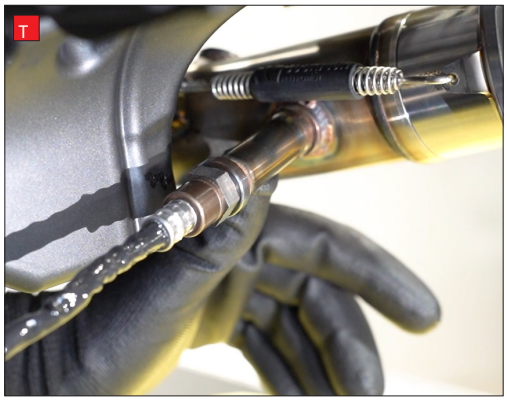

Q) Adjust the system if necessary, then fully tighten the header nuts.

R) Fully tighten the mounting bracket bolt.

S) Fully tighten the silencer mounting bolt.

T) Screw the rear Lambda sensor, along with the Lambda catalyst and copper washer into the rear sensor boss on the collector.

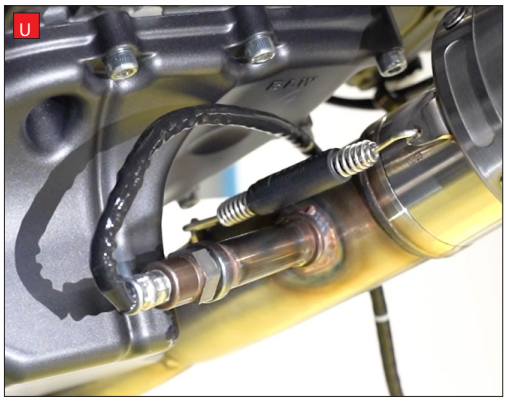

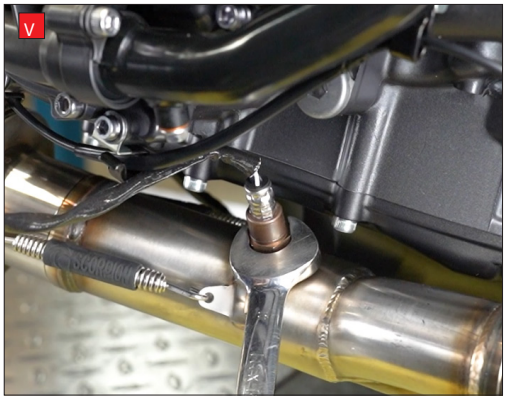

U) Feed the cable over the top of the exhaust, then up the side of the engine along the route it originally took. Reconnect the plug.

V) Screw the front Lambda sensor into the front boss on the collector. Fully tighten.

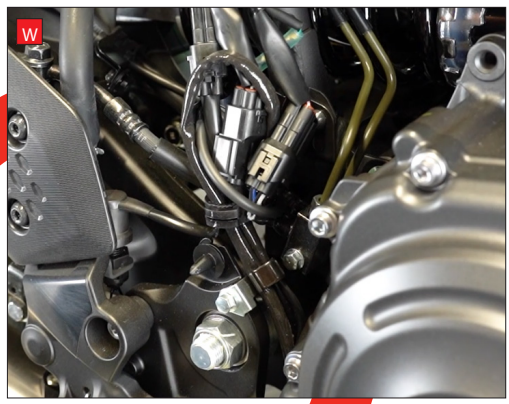

W) Run the cable along its original route and reconnect the plug.

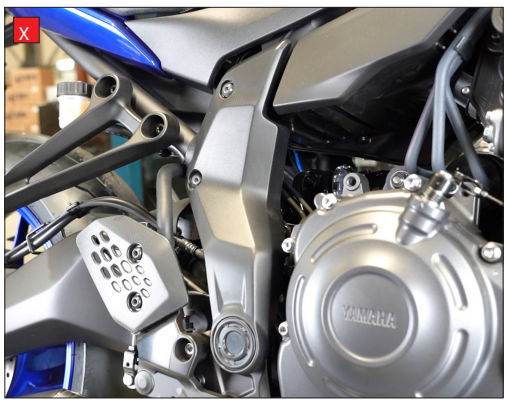

X) Refit the plastic side panel.

When fitted take bike for a short ride to ensure all functions are correct. When bike & exhaust are cool enough check all nuts and bolts are still secure.
