Bike	Suzuki GSX-R	**Part No.**	RSI-123
Year	2017-	**Fit Kit**	Z039.10608
Notes	Where not supplied use original	**dB Killer**	SCEXDBK25 - (Type Y)

Note: These instructions show and RP1-GP silencer, It is the same instructions for the Serket parallel silencer.

These instructions are to show the swapping over of the heat shield. Before following them you need to remove the original exhaust, taking care to keep all original components in a safe place. Fit the Scorpion exhaust following the line diagram above. Do not fully tighten the clamp as you may need to rotate it for heat shield alignment.

A) Unbolt the original heat shield from the original clamp.

B) Slide the heat shield off the clamp.

C) Carefully remove the rubber of the original clamp.

D) Slide the rubber onto the Scorpion clamp ensuring it holds in place.

E) Slide the heat shield onto the rubber then using the original bolt loosely fasten the heat shield to the pipe.

F) Twist the clamp to align the heat shield. Once happy with the alignment, tighten all fittings.

G) When fitted take bike for a short ride to ensure all functions are correct.

H) When bike & exhaust are cool enough check all nuts and bolts are still secure.
