ISSUE	00
AUTHORISED	G. O'Shea

NOTE: ENSURE SCORPION SYSTEM IS CLEAR OF MOVING PARTS AND ALL ORIGINAL FUNCTIONS WORK CORRECTLY.

Bike	Kawasaki Ninja H2 SX	Part No.	PKA-147
Year	2022-Current	Fit Kits	Z039.10741
Notes	Where not supplied use original fittings Remove OE gasket to allow fitment of the Scorpion connecting pipe	dB Killer	SCEXDBK46 (TYPE PA)

A) Loosen the clamp for the silencer.

B) Remove the silencer mounting bolt.

C) Carefully remove the silencer.

D) Slide the Scorpion connecting pipe and clamp over the original exhaust.
NOTE: If the gasket is still on the original pipe you will need to remove it. The Scorpion connecting pipe does not require a gasket.

E) Slide the Scorpion silencer onto the connecting pipe and adjust the position of both until the mounting bracket on the silencer aligns with the mounting bracket on the bike.
NOTE: The Scorpion silencer mounts to the front of the mounting point unlike the original that mounts to the rear.

F) Put the bolt through the bolt finisher then insert through the mounting bracket and the mounting point on the bike. Loosely secure in place with the washer and nut. You will fully tighten in a later step.

G) Fully tighten the clamp between the connecting pipe and silencer.

H) Fully tighten the silencer mounting bolt.

Take the bike for a short ride to ensure all functions are correct. When the bike & exhaust are cool enough check all nuts and bolts are still secure.
