Bike	Honda CB125R	Part No.	RHA-198-SYS
Year	2021-2024	Fit Kits	Z039.10713
Notes	Where not supplied use original fittings. For models with single sensor only.	dB Killer	SCEXDBK42 - (TYPE MM)

PLEASE NOTE: When fitting this exhaust system with foot peg delete kit HA198FD, Parts: 6, 7, 8 and 9 are not required. Instruction H, I, J, K and R can be ignored.

A) Remove the two side bolts on the front fairing.

B) Remove the two front bolts on the front fairing. The fairing will now come off of the bike.

C) Unplug the Lambda sensor.

D) Remove the two nuts from the header pipe.

E) Supporting the weight of the system remove the exhaust mounting bolt from the left hand side of the bike. The exhaust can now be removed from the bike.

F) Unbolt the lambda sensor from the original exhaust.

G) Re-fit the lambda sensor in to the Scorpion pipe work.

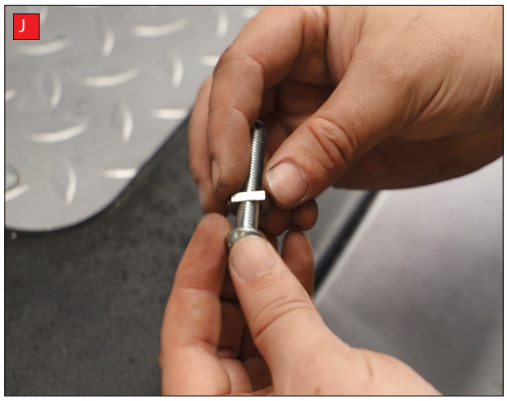

H) Remove the split pin from the right hand pillion foot peg.

Bike	Honda CB125R	Part No.	RHA-198-SYS
Year	2021-2024	Fit Kits	Z039.10713
Notes	Where not supplied use original fittings. For models with single sensor only.	dB Killer	SCEXDBK42 - (TYPE MM)

I) Remove the original fitting from the foot peg. Do not open or move the foot peg whilst this fitting is removed.

J) Place the spacer over the button head bolt.

K) Insert the bolt in to the foot peg and fasten to the mounting bracket. Ensure that the flat on the spacer is lined up with the flat of the foot peg.

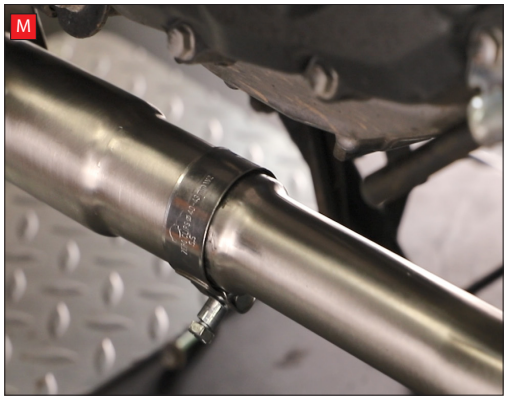

L) Loosely fit the header pipe to the bike.

M) Slide the clamp over the connecting pipe before fitting it to the header pipe.

N) Loosely bolt the connecting pipe through the original mounting point.

O) Slide the silencer on to the connecting pipe and bolt to the mounting bracket.

P) Secure the silencer to the connecting pipe using the rubber coated springs.

Bike	Honda CB125R	Part No.	RHA-198-SYS

Notes	Where not supplied use original fittings. For models with single sensor only.	dB Killer	SCEXDBK42 - (TYPE MM)

Q) Once happy with the alignment of the exhaust, start from the front of the system working your way back, tighten all fittings.

R) Insert the split pin in to the button head. Fold the tabs around the bolt to secure it.

S) Plug the lambda sensor back in and secure the cable behind the original clip.

T) Re-fit the front fairing and fully tighten all 4 bolts.

U) When fitted take bike for a short ride to ensure all functions are correct. When bike & exhaust are cool enough check all nuts and bolts are still secure.
