Notes	Where not supplied use original fittings	dB Killer	N/A

A) Un-bolt the heat shield and remove it from the bike.

B) Loosen the clamp holding the original silencer.

C) Support the weight of the silencer and remove the mounting bolt.

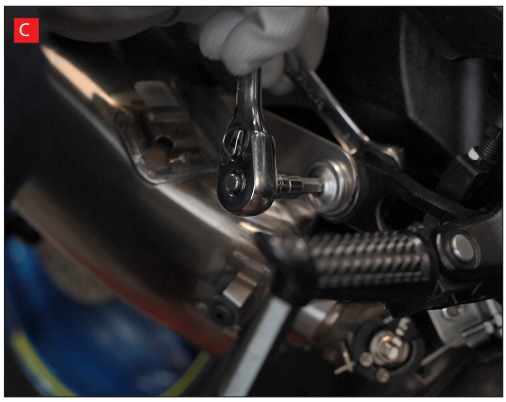

D) Remove the silencer from the bike.

E) Remove the gasket from the bike. This may have already been removed with the silencer.

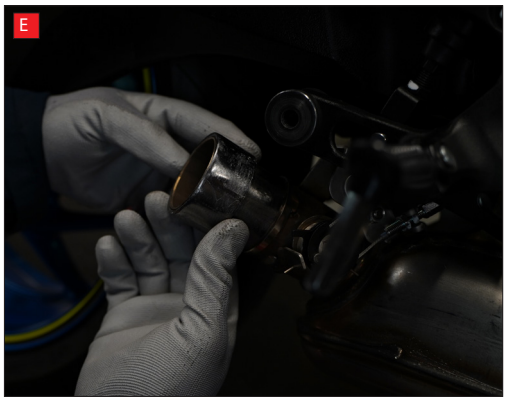

F) Fit the Scorpion exhaust to the bike ensuring the clamp is over the pipe work.

G) Secure the bracket on the Scorpion silencer behind the original mounting point using the original nut and bolt.

H) Tighten the band clamp.

Notes	Where not supplied use original fittings	dB Killer	N/A

I) Carefully remover the rubber cap from the original exhaust.

J) Fit the rubber cap on to the bracket on the Scorpion pipe work.

K) Slide the heat shield on to the pipe work and secure with the original bolt.

When fitted take bike for a short ride to ensure all functions are correct. When bike & exhaust are cool enough check all nuts and bolts are still secure.
